EXAMINER

FISCHER, ANDREW J

ART UNIT	PAPER NUMBER
----------	--------------

3627

DATE MAILED: 12/23/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/881,533

Applicant(s)

JOHNSON ET AL.

Examiner

Andrew J. Fischer

Art Unit

3627

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 September 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 156-224 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 156-224 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Acknowledgements

1. Applicants' amendment filed September 30, 2004 is acknowledged. Accordingly, claims 156-224 remain pending.
2. This Office Action is written in OACS. Because of this, the Examiner is unable to control formatting, paragraph numbering, font, spelling, line spacing, and/or other word processing issues. The Examiner sincerely apologizes for these errors.

Claim Rejections - 35 USC §102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office Action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States. . . .

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 156-170 are rejected under 35 U.S.C. §102(b) as being anticipated by Taricani, Jr. (U.S. 6,016,479) ("Taricani '479"). Taricani '479 discloses the claimed invention including collecting the taxes at the sale (column, 12, ~ lines 1-40).
5. Claims 156-170 are rejected under 35 U.S.C. §102(b) as being clearly anticipated by Chong (U.S. 5,335,169).

Claim Rejections - 35 USC §103

5. The following is a quotation of 35 U.S.C. §103(a) which forms the basis for all

obviousness rejections set forth in this Office Action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 156-213 are rejected under 35 U.S.C. §103(a) as being unpatentable over Taricani

‘479.¹ It is the Examiner’s principle position that the claims are anticipated because of the

inherencies noted above.

However if not inherent, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify Taricani ‘479 to actually include the “cumbersome procedure.” Such a modification would have allowed the states to actually collect the tax monies owed to them.

7. Additionally, if the sever structure was not inherent, it too would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Taricani ‘479 to include the claimed server structure. It is the Examiner’s position that absent evidence of new or unexpected results, it is not inventive in terms of patentability to take one or more servers ($S_1, S_2, S_3, \dots S_N$) which perform one or more tasks ($T_1, T_2, T_3, \dots T_N$) and add (or subtract) an additional number of servers (X) to perform all or part of the same tasks by allocating the tasks between the various servers (*i.e.* S_1 and S_{N+1} perform T_1 ; S_2 and S_{N+2} perform T_2 ; S_3 and S_{N+3}

¹ See MPEP §2112 expressly authorizing alternative §102/§103 rejections when the question of inherency is present in the anticipation rejection.

Art Unit: 3627

perform T_3 ; ... while S_N and S_{N+X} perform T_N). The prior art is replete with examples showing why such scaling (both increasing and decreasing the number of servers) is desirable.²

8. In other words, a modification increasing the number of servers (*e.g.* having two servers perform a task previously performed by one server) is analogous to making functions, structures, or actions separable. It is the Examiner's position that when the difference between the claimed invention and the prior art is that the prior art does not disclosed an element as separable, as a matter of law, it would have been obvious to one having ordinary skill in the art to make the element separable. See MPEP §2144.04 V. C. and *In re Dulberg*, 289 F.2d 522, 523, 129 USPQ 348, 349 (CCPA 1961). As noted above, it is desirable to allocate the server tasks to various servers to help reduce bandwidth bottlenecks and to help increase the benefits from economies of scale in addition to offering increased security, excellent data management, fast response, and room for expansion.

9. Moreover, it is old and well known in the art that storage mediums are configured as databases. See *e.g.* Wolfe et. al. (U.S. 6,282,517 B1) ("Wolfe"):

² See *e.g.* Watson (U.S. 6,223,209 B1) disclosing distributed satellite world wide web servers containing identical information placed strategically throughout the Internet so as to be close to all potential clients to help reduce traffic bottlenecks; Midgely et. al. (U.S. 5,592,611 A) disclosing additional servers as a stand-in for a failed server so that client service requests are transparent to the user; Kriegsman (U.S. 6,370,580 B2) disclosing multiple servers as secondary web servers to optimize file transfers; Burns et. al. (U.S. 6,298,373 B1) disclosing cache servers which download content during off-peak hours to reduce traffic bottlenecks; Stiles (U.S. 6,219,692 B1) which discloses sending essentially identical tasks to multiple servers with differing processing loads to find the most preferred server provider; Zdepski et. al. (U.S. 5,825,884) disclosing an transactional server for TV networks; *How Networks Work*, Chapter 17 describing how sever based structures benefit from economies of scale in addition to offering security, excellent data management, fast response, and room for expansion; and *How the Internet Works*, Chapter 44 implementing a server based architecture in Internet e-commerce.

Those of ordinary skill in the art will recognize that the Data Center programs, the Data Center databases, and gateway functionality may advantageously be implemented on one or more computers. These computers may be uniprocessor or multiprocessor machines. Wolfe, column 6, ~ lines 19-22.

10. In an alternative embodiment in Wolf, the Data Center storage medium **106** may be configured as a database from which information can be both stored, updated, and retrieved. For example, the database may conform to the SQL standard. In another alternative embodiment, the database may conform to any database standard, or may even conform to a non-standard, private specification. The Data Center programs may provide access to the information stored on the Data Center storage medium **106**. The Data Center storage medium **106** may be accessed by devices such as clients, servers, workstations, personal computers, and the like, connected to the network **102** or the LAN **108**. Wolfe, column 6, ~ lines 43-54.

11. After careful review of the entire record, especially the specification, the Examiner finds that Applicants have not asserted any new or unexpected results regarding their hardware configuration (“providing a client with said modified client database”) of their server system. Absent such new or unexpected results, such modifications either increasing or decreasing the number of servers or computers or even reassigning tasks to different server(s) or computers would have helped maintain benefits from economies of scale in addition to offering increased security, excellent data management, fast response, and room for expansion while reducing both operating and capital costs.

12. Claims 156-224 are rejected under 35 U.S.C. §103(a) as being unpatentable over Taricani ‘479 in view of Wilmes et. al. (U.S. 2002/0116302 A1)(“Wilmes”). Taricani ‘479 discloses as discussed above but does not directly disclose the postal and GPS limitations. Wilmes discloses

Art Unit: 3627

the claimed invention including the GPS and postal information. Therefore it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify Taricani '479 as taught by Wilmes and include Wilmes's taxing by location. Such a modification would have reflected a more accurate taxing method.

13. It is the Examiner's position that claims 156-224 do not have express support in Applicants' provisional priority documents. Should Applicants expressly point out where support is found in their priority documents for claims 156-224 in a response that is of record, thus providing an effective U.S. filing before Wilmes, this rejection will be withdrawn.

14. The Examiner concludes that Applicants have decided not to be their own lexicographer by indicating and defining claim limitations to have meanings other than their ordinary and accustomed meanings. To support this position, the Examiner relies on the following factual findings. First and as noted in the previous Office Action,³ the Examiner has carefully reviewed the specification and prosecution history and can not locate any lexicographic definition(s). Second, the Examiner finds that not only have Applicants not pointed to definitional statements in their specification or prosecution history, Applicants have also not pointed to a term or terms in a claim with which to draw in those statements⁴ with the required clarity, deliberateness, and

³ See the Examiner's previous Office Action mailed April 28, 2004, Paragraph No. 17.

⁴ "In order to overcome this heavy presumption in favor of the ordinary meaning of claim language, it is clear that a party wishing to use statements in the written description to confine or otherwise affect a patent's scope must, *at the very least*, point to a term or terms in the claim with which to draw in those statements. [Emphasis added.]" *Johnson Worldwide Assocs. v. Zebco Corp.*, 175 F.3d 985, 989, 50 USPQ2d 1607, 1610 (Fed. Cir. 1999).

Art Unit: 3627

precision.⁵ Third, after receiving express notice in the previous Office Action of the Examiner's position that lexicography is not invoked,⁶ Applicants have not pointed out the "supposed errors" in the Examiner's position regarding lexicography invocation in accordance with 37 C.F.R. §1.111(b) (*i.e.* Applicants have not argued lexicography is invoked). Finally and to be sure of Applicants' intent, the Examiner also notes that Applicants have declined the Examiner's express invitation⁷ to be their own lexicographer.⁸ Accordingly and for due process purposes, the Examiner gives notice that for the remainder of the examination process (and unless expressly noted otherwise by the Examiner), the heavy presumption in favor of the ordinary and accustomed meaning is not overcome; the claims therefore continue to be interpreted with their "broadest reasonable interpretation" *In re Morris*, 127 F.3d 1048, 1054, 44 USPQ2d 1023, 1027 (Fed. Cir. 1997).⁹ The Examiner now relies heavily and extensively on this

⁵ "The patentee's lexicography must, of course, appear 'with reasonable clarity, deliberateness, and precision' before it can affect the claim." *Renishaw PLC v. Marposs Societa' per Azioni*, 158 F.3d 1243, 1249, 48 USPQ2d 1117, 1121 (Fed. Cir. 1998) citing *In re Paulsen*, 30 F.3d 1475, 1480, 31 USPQ2d 1671, 1674 (Fed. Cir. 1994).

⁶ See again the Examiner's previous Office Action, Paragraph No. 17.

⁷ Id.

⁸ The Examiner's requirements on this matter were reasonable on at least two separate and independent grounds. First, the Examiner's requirements were simply an express request for clarification of how Applicants intend their claims to be interpreted so that lexicography (or even an *attempt* at lexicography) by Applicants was not inadvertently overlooked by the Examiner. Second, the requirements were reasonable in view of the USPTO's goals of compact prosecution, productivity with particular emphasis on reductions in both pendency and cycle time, and other goals as outlined in the USPTO's The 21st Century Strategic Plan, February 3, 2003 available at www.uspto.gov/web/offices/com/strat21/index.htm (last accessed December 20, 2004).

⁹ See also *In re Bass*, 314 F.3d 575, 577, 65 USPQ2d 1156, 1158 (Fed. Cir. 2002) ("In examining a patent claim, the PTO must apply the broadest reasonable meaning to the claim language, taking into account any definitions presented in the specification. Words in a claim

Art Unit: 3627

interpretation.¹⁰ Unless expressly noted otherwise by the Examiner, the preceding claim interpretation principles in this paragraph apply to all examined claims currently pending.

15. Functional recitation(s) using the word “for” or other functional terms (*e.g.* “for commodities identified by uniform commodities code” as recited in claim 157) have been considered but given less patentable weight¹¹ because they fail to add any steps and are thereby regarded as intended use language. A recitation of the intended use of the claimed invention must result in additional steps. See *Bristol-Myers Squibb Co. v. Ben Venue Laboratories, Inc.*, 246 F.3d 1368, 1375-76, 58 USPQ2d 1508, 1513 (Fed. Cir. 2001) (Where the language in a method claim states only a purpose and intended result, the expression does not result in a manipulative difference in the steps of the claim.).

16. Additionally, the Examiner notes that “the PTO and the CCPA acknowledged product-by-process claims as an exception to the general rule requiring claims to define products in terms of structural characteristics.” *Atlantic Thermoplastics Co. v. Faytex Corp.*, 970 F.2d 834, 845, 23 USPQ2d 1481, 1490 (Fed. Cir. 1992) (hereinafter “*Atlantic Thermoplastics v. Faytex P*”). Furthermore, the Federal Circuit “acknowledges that it has in effect recognized . . . product-by-process claims as exceptional.” *Atlantic Thermoplastics v. Faytex I*, 970 F.2d at 847, 23 USPQ2d at 1491.

are to be given their ordinary and accustomed meaning unless the inventor chose to be his own lexicographer in the specification”) (citations omitted); *In re Etter*, 756 F.2d 852, 858, 225 USPQ 1, 5 (Fed. Cir. 1985) (en banc); and MPEP §§ 2111 and 2111.01.

¹⁰ See 37 C.F.R. §1.104(c)(3) which states in part: “the examiner may rely upon admissions by applicant . . . as to *any matter* affecting patentability [Emphasis added.]”

¹¹ See *e.g. In re Gulack*, 703 F.2d 1381, 217 USPQ 401, 404 (Fed. Cir. 1983)(stating that although all limitations must be considered, not all limitations are entitled to patentable weight).

Because of this exceptional status, the Examiner has carefully reviewed the claims and it is the Examiner's position that claims 156-224 *do not* contain any product-by-process limitations whether in a conventional format or otherwise. If Applicants disagree with the Examiner, the Examiner respectfully requests Applicant(s) in their next response to expressly point out any product-by-process claim(s) and their limitations so that they may be afforded their exceptional status and treated accordingly. Applicants are reminded that "even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself." *In re Thorpe*, 777 F.2d 695, 697, 227 USPQ 964, 966 (Fed. Cir. 1985) (citations omitted).¹² Failure by Applicants in their next response to also address this issue in accordance with 37 C.F.R. §1.111(b) or to be non-responsive to this issue entirely will be considered intent by Applicant(s) *not* to recite any product-by-process limitations. Unless expressly noted otherwise by the Examiner, the preceding discussion on product-by-process principles applies to all examined claims currently pending.

Response to Arguments

17. Applicants' arguments filed September 30, 2004 have been fully considered but they are not persuasive.

18. Applicants argue that Taricani '479 does not disclose the actual collection of sales taxes. The Examiner respectfully disagrees. Taricani '479 directly teaches the problems associated with collecting taxes for multiple jurisdictions (bottom of column 11).

19. Applicants remaining arguments are moot in view of the new grounds of rejection.

¹² See also MPEP §2113.

Conclusion

20. Applicants' amendment necessitated the new grounds of rejection presented in this Office Action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP §706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. §1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 C.F.R. §1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

21. References considered pertinent to Applicants' disclosure are listed on form PTO-892.

22. The following two (2) citations to the Manual of Patent Examining Procedure ("MPEP") apply to this Office Action: MPEP citations to Chapters 100, 200, 500, 600, 700, 1000, 1100, 1300, 1400, 1500, 1700, 1800, 2000, 2100, 2200, 2500, 2600, and 2700 are from the MPEP 8th Edition, Rev. 2, May 2004. All remaining MPEP citations are from MPEP 8th Edition, August 2001.

23. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR

Art Unit: 3627

system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

24. Because this application is now final, Applicant(s) are reminded of the USPTO's after final practice as discussed in MPEP §714.12 and §714.13 and that entry of amendments after final is *not* a matter of right. "The refusal of an examiner to enter an amendment after final rejection of claims is a matter of discretion." *In re Berger*, 279 F.3d 975, 984, 61 USPQ2d 1523, 1529 (Fed. Cir. 2002) (citations omitted). Furthermore, suggestions or examples of claim language provided by the Examiner are just that—suggestions or examples—and do not constitute a formal requirement mandated by the Examiner. Unless stated otherwise by an express indication that a claim is "allowed," exemplary claim language provided by the Examiner to overcome a particular rejection or to change claim interpretation has *not been addressed* with respect to other aspects of patentability (*e.g.* §101 patentable subject matter, §112 1st paragraph written description and enablement, §112 2nd paragraph indefiniteness, and §102 and §103 prior art). Therefore, any claim amendment submitted under 37 C.F.R. §1.116 that incorporates an Examiner suggestion or example or simply changes claim interpretation will nevertheless require further consideration and/or search and a patentability determination as noted above.

25. In accordance with the USPTO's goals of customer service, compact prosecution, and reduction of cycle time, the Examiner has made every effort to clarify his position regarding claim interpretation and any rejections or objections in this application. Furthermore, the Examiner has again provided Applicants with notice—for due process purposes—of his position regarding his factual determinations and legal conclusions. The Examiner notes and thanks

Art Unit: 3627

Applicants for their "Remarks/Arguments" (beginning on page 21) traversing the Examiner's positions on various points. If Applicants disagree with any additional factual determination or legal conclusion made by the Examiner in this Office Action whether expressly stated or implied,¹³ the Examiner respectfully reminds Applicants to properly traverse the Examiner's position(s) in accordance with 37 C.F.R. §1.111(b) in their next properly filed response. By addressing these issues now, matters where the Examiner and Applicants agree can be eliminated allowing the Examiner and Applicants to focus on areas of disagreement (if any) with the goal towards allowance in the shortest possible time. If Applicants have any questions regarding the Examiner's positions or have other questions regarding this communication or even previous communications, Applicants are strongly encouraged to contact Examiner Andrew J. Fischer whose telephone number is (703) 305-0292. If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's immediate supervisor, Robert Olszewski, can be reached at (703) 308-5183. The fax number for facsimile responses is now (703) 872-9306.

Andrew J. Fischer
